

YOU WON'T BE ALONE

during your FtP investigation

Receive one to one support and guidance
from someone that's been where you are now

In 2017 I was referred to the NMC for investigation. With no external support I had to navigate the frightening process on my own. This experience motivated me to set up NMCWatch with a vision to ensure no one would feel alone during their FtP investigation. Those of us who have been through this, only truly understand the range of Emotions you will be going through. We will support, educate and mentor you so you are fully prepared.

Cathryn Watters, Director (RGN) NMCWatch

The Laura Hyde Foundation is proactively working with NMCWatch to help them fulfil their vision. We're working to ensure that healthcare professionals never feel isolated if they have to go through an FtP investigation.

An incredible network of buddies that have experienced the process themselves have come together to support you and your colleagues by listening and imparting valuable knowledge when you need it the most.

In partnership with

You're not alone.
